**DIGITAL EARTH ANNOUNCES SUCCESSFUL FUNDING ROUND**

**LONDON, England** – Digital Earth Inc. today announced the conclusion of a successful million dollar plus angel funding round.

“These angel funds, when combined with our existing early stage revenues, will facilitate a significant acceleration of our development activities over the coming year”, stated Robert Winsloe, President of Digital Earth. “We’re fortunate that much of our business development and data activities are self-funding so we’ll be able to focus these additional funds on product development.”

“The important thing is that we’ve been able to get as far as we have without outside funding”, continued John Redfern, Chairman of Digital Earth. “With a large majority of the equity still uncommitted to outside interests, and a solid group of industry-savvy investors onboard, we’re confident we’re going to have the time, and the additional funding capacity, to make a real impact.”

Founded in 2006, by a group of energy and Internet professionals, Digital Earth is dedicated to improving search capabilities and data accessibility for both the traditional and alternative energy markets. Digital Earth is incorporated in the Cayman Islands, but has distributed resources worldwide. For more information please consult: [www.digital-earth.com](http://www.digital-earth.com).
